

ENVIRONMENTAL POLICY

We, at **ACP Metal Finishing Pte Ltd**, are committed to protect the environment and improve our environmental performance by seeking continual improvement to our operational flows to prevent pollution to the environment as they relate to our plating processes and related services.

We strive to commit to the following guiding principles in carrying out our environmental policy:

- Ensure compliance with relevant environmental legislative requirements and others compliance obligation identified on environmental management.
- Manage our environmental impacts through efficient use of energy and resources, minimization of waste to protect the environment and prevention of air, water, and land pollution.
- Promote environmental awareness and provide appropriate training to employees on the relevant environmental issues.
- Maintain and continually improve our environmental management system and review compliance by conducting periodic audits and reviews.

The development and implementation of this policy is a commitment of the management and a shared responsibility with all our employees.
